

Leaving a Mark: Sacred Geometry Tattoo and Chakra Tattoo

Leaving a Mark exposes readers to the multiple dimensions of body art ranging from a vehicle for social activism to medicinal practices. I also relate exotic topics like bio hacking and sacred geometry to the craft (tattooing, piercing, body modifications). I wouldn't call myself an expert on bio hacking, but I've been intimately studying such content for almost a decade. I'm 30 now. So come along for this study of interrelationships. Use this series of books as a compass to guide you through the abstract terrains of bio hacking and consciousness. The recipe that comprises this book's content attracts all, young and old. Leaving a Mark is like playing connect-the-dots on both a micro- and macrocosmic scale. Our planet's most influential minds agree the best way to protest something is becoming the personification of that very change. What better way to do that than through the culture of body art? Here are some of the most used words in the book: A medicinal slant on the trade of body art, Body Art, Body Art Learners Guide, body work, Geomancy, Light Stream Technologies, Michael Anthony Alberta, subtle energy, Symbolism, symbolism and human vortex points, The application of Shape and Proportion to body art, The multiverse and alternate dimensions, transforming the human condition, Transhumanism body art and transhumanism, brain implantable chips, conspiracy theories about transhumanism, piercing and transhumanism, RFID, tattoo and transhumanism, bio hacking, Transhumanism, Transhumanist Declarations, autonomous systems, bio hacking, brain transplants, China's rat car, computerized implants, bio hacking, DAARPA, Extended Performance War Fighter, genetic uplifts, bio hacking, Marrying the energy healer with high technology, neurofeedback machines, psychedelic/performance enhancing drugs,
