

Personnel Concepts Fire Prevention Program; Item #FD-FPP

Fire is the most common workplace emergency that requires the evacuation of employees. Workplace fires and explosions kill 200 and injure more than 5,000 workers each year, with an estimated annual cost to businesses of more than \$2.3 billion dollars. Employers must ensure that their employees know about fire hazards and what to do should a fire emergency occur. OSHA's code 29 CFR 1910.39(b) states that a fire prevention plan must be in writing, be kept in the workplace, and be made available to employees for review or communicated orally for businesses with 10 or fewer employees. With Personnel Concepts Fire Prevention Program, you can protect your employees by implementing a customized fire prevention plan that will help you prepare for a disaster ahead of time, thereby protecting your company from potentially life-threatening emergencies and possible fines while ensuring good faith compliance with OSHA's fire prevention standards.
