

America, a Nation in Denial

Would President Roosevelt have entered into free trade agreements with Japan and Germany during World War II? A dumb question? Then why are the leaders of the U.S. and Canada obsessed with signing free trade agreements with China and Korea during an attack on our economy that is vaporizing manufacturing, sending office and professional jobs to Asia, leaving many middle class workers unable to earn a living and creating massive trade deficits? In the 1970s, the cold war was raging. The Communist Party of China needed a solid plan to defeat the U.S.A. their archenemy. Atomic weapons wouldnt work because Americas nuclear submarines would retaliate. So, how to win? The answer was beyond brilliant. It would take several decades but the Chinese are patient beyond belief. They would destroy our nations economy by dismantling Americas industrial base piece by piece. Using covertly manipulated exchange rates, China offered corporations Made in China products from auto parts to pharmaceuticals at costs up to 90% less than they were spending. By 2014, Made in America and Made in Canada are becoming extinct; Americas industrial base is vaporizing; millions of workers from teenagers to 60-somethings cant find work; the rich get richer while the middle class shrinks; saving enough money to retire seems impossible; trade deficits soar; our national debt explodes. Instead of domestic workers, companies now pay workers in China, India and elsewhere to supply office, legal and other professional services, create software and more. And how do our political leaders respond they deny that any such problems exist and turn America into a nation in denial. So, how do we stop getting sucked further into the Chinese Vortex?
