

Business Organizations and Systems (Longman GNVQ Business Studies - Advanced Level)

The Longman GNVQ Business series provides coverage of all the mandatory units required at Foundation, Intermediate and Advanced level GNVQ. This text covers Advanced level and contains activities throughout to help students understand the issues covered, to apply the knowledge they have acquired and to encourage their own investigations. Case studies, comments and other examples are used to provide students with an insight into peoples experiences of working within business establishments. Core skills are fully integrated within the materials. To test each students understanding of the issues covered there is a review section at the end of each booklet. The assessment process is also supported by a range of project ideas found at the end of each element. These can be used to provide evidence of achievement.
