

The Great Controversy: Creation or Evolution?

This book is an aid to the Apologetics ministry. It sheds light on the evidence that the Bible does not in any way contradict true science. The author demonstrates how denial of God's existence is the root of many of the problems that the world is facing. It also proves to the reader that the Bible in fact motivates us to advance in knowledge and its application for the good of humanity and for the glory of God. Various scientific utterances mentioned in the Bible, and which have taken science centuries to prove and appreciate, are noted in detail. This book also highlights scientists of the past who based their findings on the Bible as well as recent challenges and how Christians are handling them. The great controversy Evolutionary theories have been refuted using modern scientific discoveries. In all, the Christian believer is motivated to advance in his/her career, and also to hold on to his/her faith in the One who motivates both to will and to do His good pleasure. Finally, Christian scholars and believers are exhorted to continue preaching the enduring gospel that the Creator became our Redeemer.
