

No Doorway Wide Enough

It was just about three weeks after his 45th birthday in 2000 when Bill Schmalfeldt was diagnosed with Parkinsons disease. In 2007 while working at a federal agency as a writer and podcaster, telling other people about the importance of clinical trials, Bill heard about and volunteered for an experimental brain surgery to determine whether or not deep brain stimulation could be done on patients in the earlier stages of the disease. This is the story of Bills Parkinsons Decade from being diagnosed in 2000, to having the surgery in 2007, through today. The story is told in a humorous, satirical, almost jovial style and should be on the reading list of anyone with Parkinsons, or anyone who knows or loves someone who does. All author proceeds from the sale of this book will be donated to PD Research Charities.
