

STAR TREK ONLINE STO ENERGY CREDIT STRATEGIES TIPS AND TRICKS

Star Trek online is a new MMO (Massively Multiplayer online game) released in February of this year. This eBook details strategies on how to make large amounts of In Game Energy credit currency. My hope is with this guide you will save yourself time and be in a much better financial position by the time you reach endgame. This eBook covers actual tried and tested strategies which have worked in the first month of the game. I hope my trial and error during my adventures can help you have a better experience and have a large sum of credits. As of this writing I see many gold spammers advertising their wares at \$20-\$40 USD per million. Imagine having 10, 20, or 50 million by the time you hit level cap, and how much that works out to in dollar terms. Remember, this is only a guide for what worked best for me. Chances are you play this game to relax and have fun. If any of the following dont seem like fun to you, simply play the way you enjoy. For me levels 1-45 are the first month of my time and who knows I might spend years at level 45 (RA5), for me I am much more concerned about how I will spend the long time at the level cap and not the relatively short period leveling up.
