

Management of Transmission & Distribution Systems

Seevers demonstrates how to use innovative solutions to address a wide range of unique problems and scenarios encountered in everyday operation of a utility. Contents: System maintenance and operations; Land rights; Trees; Lightning; Pole and preventive maintenance; Inspections; System Coordination; OCR and switch maintenance; Contractors; Trouble; The service center; The pole yard; Efficiency rating (E/R) system; Institute the program; Evaluate the data; E/R to measure office activity; Implement indicated improvements; Monitor the effects; A load management program; More trouble ; E/R meter shop; E/R substation department; Final word; Unique power system problems - solved; Management and engineering - lessons from experience; Lets get serious about land rights; Liability goes with owning an easement; Clearance between energized conductors; Efficiency-reports; Crazy construction photos.
