

# Transactionalism: An Historical and Interpretive Study

This book is the result of what started out to be a simple search to find an answer to what I thought was a simple question: What is transactionalism? Until this writing, Transactionalism simply had no codified or single source of reference and yet, with very little exception, how the term has been described and explained remained fairly consistent across numerous landscapes of study. Trevor J. Phillips offers a fundamental and supporting work entitled Transactionalism - An Historical and Interpretive Study. Published by Influence Ecology, with foreword by co-founder Kirkland Tibbels.
