

Thirteen: The Apollo Flight That Failed

Houston, weve had a problem here. On the evening of April 13, 1970, the three astronauts aboard Apollo 13 were just hours from the third lunar landing in history. But as they soared through space, two hundred thousand miles from earth, an explosion badly damaged their spacecraft. With compromised engines and failing life-support systems, the crew was in incomparably grave danger. Faced with below-freezing temperatures, a seriously ill crew member, and a dwindling water supply, a safe return seemed unlikely. Thirteen is the shocking, miraculous, and entirely true story of how the astronauts and ground crew guided Apollo 13 to a safe landing on earth. Expanding on dispatches written for the New Yorker, Henry S. F. Cooper Jr. brings listeners unparalleled detail on the moment-by-moment developments of one of NASAs most dramatic missions.
