

Whos Buying Apparel

The tenth edition of Who's Buying Apparel is based on unpublished data collected by the Bureau of Labor Statistics 2013 Consumer Expenditure Survey you can't get these data online. It examines how much Americans spend on apparel by the demographics that count age, income, high-income households, household type, race and Hispanic origin, region of residence, and education. To round out the spending picture, it also presents who-are-the-best-customers analyses of the data, showing the best and biggest customers at a glance. It looks at who buys apparel and shoes for infants, boys and girls, men and women, plus jewelry, sewing material, laundering, dry cleaning, and more.
